By ARTHUR BRISMAN

40 Billions, Cheap. Good Pay, No Drink. Power, Unlimited, Perhaps. Sons, Full Grown.

Ralph S. Kelley of the Field Division of the National Land Office in Denver, success government officials of selling forty billion dollars worth of public land at \$2.00 an acre.

The wide "spread" between two million and forty billion amounts to \$2,980,000,000.

The charges, made by an official, will have the attention of the President and Secretary of War in spite of the fact that it is impossible to say any actual value for the land.

Notwithstanding, investigation is necessary of the charge that "damians" are hired to take up small sections of public land at two dollars and a half an acre, the "damians" turning their purchases over to big companies.

Musallini said he will do anything to avoid war. And part of his plan for avoiding war is to keep money for it. He expects to see the property of the whole world, including Russia, in three years, and casual wars, "Russia" is the word.

In Russia, they do more than any other country. They take the speculators out in two and three, and shoot them, if they speculate in a way that Russia considers injurious.

When Henry Ford said he must close his factories if prohibition came to an end, he was asked how he could run the factories in England and other countries with no prohibition.

Today Mr. Ford announced that workers in his enormous British factory at Dagenham will not be allowed to drink "even a glass of beer at lunch."

When British reporters asked how Mr. Ford proposed to keep Britons from having their beer, he replied, "We shall attend to it in our own way, and would give no other answer."

The British will not take kindly any effort to force upon them a prohibition, a prohibition that has not yet been forced upon America at home.

Experiments in China by Georges Claude, French scientist, may mean more to the world than the war, and most of the inventions, since Napoleon died.

Taking advantage of difference in temperature between surface and deep in the Gulf, Professor Claude has succeeded in supplying power, light forty-five watt electric lamps.

The sun actually warms the power of the sun. When that is finally accomplished, the human race will possess power millions and will do whatever it can imagine.

Mother Britannia begins to realize that her dominions' sons are children no longer, and agree, on demand of the Irish Free State, that the House of Commons shall be a free assembly.

The Irish decide that their own courts are good enough, while the country decides that it needs decisions from foreign judges. The British World Court, sitting 2,000 miles away across the ocean.

What has happened to our national back-bone?

George Russell, known as "AE," now lecturing in America, talks common sense on farming. He does not urge any "back to the farm" movement, knowing that once in the city, men from the farms rarely go back.

His mission is to persuade people to stay on their farms and make them better by increasing production on smaller acreage and building up a country life more worthy of human beings.

"AE" is interested especially, in everyone else should be, in our "one-horse farmers," numbering 7,000,000. These farmers millions have an average yearly cash income of about \$400. Their wives and children have little opportunity for enjoyment. The little they have the farm.

"AE" would persuade them to stay by making farm life happier.

The President's optimistic view of the near future, backed by sound facts and figures, should be a source of much comfort to the people of the United States, who are suffering from the effects of the war.

Particularly important is the fact, usually forgotten, that this nation consumes 90 per cent of all it produces. If tomorrow the people of the United States, consumers and distributors, should resume their normal purchasing habits, instead of holding back, in a vague, foolish fear, our prosperity conditions would immediately become 97 per cent normal.

Baptist Churches Plan Services for Enlistment Day

Churches in the Appomattox Association will observe Sunday as Enlistment Day holding services in groups at the church most convenient to all. Instructional programs have been arranged and prominent men and women in the denomination will speak during the day.

At Appomattox Mrs. G. A. Martin, of Richmond, will speak at eleven o'clock and Miss Blanche White, at 7:30. The speaker for the afternoon has not been announced. Churches in this group are: Hebron, Maple Grove, Spout Spring, Reddy Springs, Fisher Memorial and Red Oak.

Miss Blanche White will speak at Pamplin at 11 o'clock and at two o'clock and a half an acre, the "damians" turning their purchases over to big companies.

Notwithstanding, investigation is necessary of the charge that "damians" are hired to take up small sections of public land at two dollars and a half an acre, the "damians" turning their purchases over to big companies.

Bradley Babcock's Car Stolen Monday

The brown Nash Coupe owned by Bradley Babcock was stolen from in front of the Hotel Appomattox about 5 o'clock last Monday morning by two men who were seen at six o'clock later in the day.

A Buick car with the bearings burned out was left near the schoolhouse, presumably by the same men who took Mr. Babcock's car. The owner of the Buick was located at Lynchburg later in the day.

Lieutenant J. A. Bingham immediately notified state authorities of the theft when it was discovered a trace of it was not to be found.

Mr. Babcock had taken the key out of the lock, but left the car on the ledge behind the hotel where the men evidently found it. The car was about thirteen months old.

Statistics covering the state show there were 7,666 churches in Virginia with a total membership of 1,172,712. The time the survey was made, 7,213 of these churches owned buildings in which to hold services.

Appomattox Ranks Sixth For Church Membership

Sixty-Nine Per Cent of Population Affiliated With Group

Appomattox County, with a percentage of 69.9 of its population affiliated with some church, ranks sixth in the state for church membership, according to statistics compiled in 1926 by J. E. Ward, Jr., formerly an instructor in the University of Gloucester, Essex, Prince Edward, and Lancaster counties, hold rank above Appomattox in the order named. The percentage of church members in Appomattox County is considerably above the average membership of the state which is below 60 per cent.

Loan Application Period Extended

Announcement that the time for receipt of applications for loans for fall grazing crops has been extended to Oct. 25 was received today by R. B. Hudgins, county agent, in a letter from John R. Hutcheson, director of the cooperative extension work in agriculture and home economics.

Extension of the time for loans which was to expire Wednesday, Oct. 15, will give farmers ten more days in which to make application for aid for the planting of wheat, barley, and rye.

County Farm Land Decreases in Value

The value of farm lands and buildings in Appomattox County has decreased \$527,578 since the last year, according to a preliminary announcement of the results from the 1930 census made by the United States Department of Agriculture.

The decrease over the year period has been accompanied by a decrease in the value of the land and buildings. The decrease in the value of the land and buildings is shown by the acreage increase of 3,149 between 1925-30 accompanied by \$89,909 decrease in value.

Land alone has decreased \$556,724 in value since 1925, while the value of buildings has increased \$28,146 in the same period, according to statistics of the last census.

Farms of this county including the buildings, have an average value of \$2,270, while the average value per acre is \$21.69. 1,246 farms are listed for this county in the census, with 125 acres being the average size of the farm. This is an increase in the number of farms from 1,139 in 1925.

More than half the acreage in farm lands in the county is worked by the owners, while the tenant operated farms have a total value of approximately one third the total value.

More than half the acreage in farm lands in the county is worked by the owners, while the tenant operated farms have a total value of approximately one third the total value.
